

Navigate Your 3D World™

3Dconnexion's SpaceExplorer™ offers intuitive navigation for more than 100 of today's most powerful 3D design and visualization applications. Push, pull, tilt or twist the SpaceExplorer's controller cap to simultaneously pan, zoom and rotate 3D objects and environments.

Frequently Asked Questions

Q: Are there feature or performance differences between the SpaceNavigator and the SpaceExplorer?

A: Yes! The SpaceExplorer features an array of easy-to-reach function keys labeled and preprogrammed with commands. Users benefit from instant positioning with the Fit and View keys.

Q: Is there an advantage or benefit to the palm rest?

A: Yes. The soft, sculpted ergonomic design of palm rest reduces fatigue.

Q: What is the term of the warranty?

A: 3 years.

Q: I need a serial connection. Which device is right for me?

A: The SpaceExplorer is the only 3Dconnexion device that offers a serial connection option and includes all the benefits and features of the USB devices. The serial option supports UNIX and Linux.

Q: What is the difference between the SpaceExplorer and SpaceBall or SpaceMouse?

A: The SpaceExplorer replaces both the SpaceBall and SpaceMouse. While taking advantage of what users love about SpaceBall and SpaceMouse, the SpaceExplorer takes both performance and comfort to the next level. The SpaceExplorer offers state-of-art design and comfort with attention paid to easy-to-reach Fit and View keys.

Q: Are the SpaceBall and SpaceMouse being discontinued?

A: Yes. They will continue to be sold through the end of 2006 and supported through December 31, 2009.

Q: What applications does the SpaceExplorer support?

A: The entire line up of 3Dconnexion products support more than 100 3D design and visualization applications including Google Earth, Google SketchUp, Autodesk DWF Viewer, Autodesk Design Review. For a complete list of supported applications go to www.3Dconnexion.com.
